

# TOOLPRO

## PRODUCT SPOTLIGHT

### TOOLPRO

#### 4 in. Spring Clamp (2-Pack)

#TP05140

- Used for temporarily holding ceiling grid together during assembly and for holding leveling line
- Nickel-plated steel with tempered steel spring
- Rubber tips will not damage painted surfaces
- 4 in. clamps open to 1 in.

### TOOLPRO

#### Lever Action Ceiling Grid Clamp (4-Pack)

#TP05044

- Rubber tips on the Clamps hold the grid and leveling line firmly in place without damaging the grid finish
- Spring steel lever action grid clamps hold the grid or leveling line firmly
- 4 clamps in a storage pack

### TOOLPRO

#### 450 ft. Leveling Line

Part #	Pack Size
TP05054	4-Pack
TP05058	25-Pack

ToolPro Leveling Line is a high strength line that will not sag or stretch. Each Line is 450 ft. and unspools from the center core of the tubular casing; this prevents tangling and allows you to use only what is needed. This Line is used during the layout of the ceiling grid to ensure it remains level during assembly. Use with Lever Action Grid Clamps for best results.

- Each line is individually wrapped and un-spools from the center, leaving the tube intact and improving handling
- High strength leveling line will not sag or stretch, yet is sufficiently elastic to allow the grid to be repositioned several inches away without resetting the grid clamps
- Available in a 4-Pack or a bulk 25-Pack
