TOOLPRO

Adjustable Acoustical Lag Pole

Part #	Size
TP05200	6 ft. to 12 ft.
TP05220	4 ft. to 12 ft.
TP05230	6 ft. to 18 ft.
TP05240	8 ft. to 24 ft.

ToolPro Lag Poles are used to install the lag screws and wire to hang suspended ceiling grid from the overhead. You will be able to install lag screws and hanger wire from the ground in one motion. No scaffolding or ladder is needed. Use with any 3/8 in. or 1/2 in. drill.

- Extends in 12 in. increments
- Rugged steel construction for all day use on the job site
- Used to install lag screws and hanger wire in combination with any 3/8 in. or 1/2 in. drill
- Drill not included

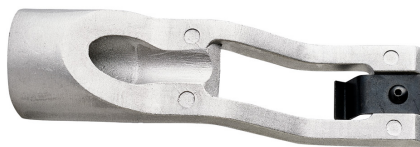

- Sold in 4 different sizes: choose the one that suits your needs
- Remove bale pin and adjust pole to reach the ceiling you are working on
- Use with any standard drill to fasten lag screws and twist ceiling wire with ease
- Combine with Threaded Adapter and Purlin Clip Installation Tool to use with Af14 & VF14 Clips
